The amount of Non-Banking assets was included in the books of accounts after receiving the verdict of the Court in favor of the Bank in accordance with the section 33(5) & 33(7) of ARAA- 2003 for force adjustment of default loan.

The value of these assets was determined on the basis of third party valuation of M/s Jorip O Poridarshan Co. and Geodetic Survey. The action of the Bank and the verdict of the court are supported by the section 33(6) of ARAA-2003 by which the Bank is empowered to sell the said assets and adjust the sale proceeds with the default loan and lodging further suit for recovery of shortfall, if any, after adjusting sale proceeds.

Non-Banking assets include stock of raw materials and finished goods worth Tk. 106,679,075 of defaulter loanee but there could be a possibility of non-realisability of the full amount of stock of raw and finished goods. The Bank believes that there is also the possibility of gaining significant value due to price appreciation from the disposal of other fixed assets of said non-banking assets. Accordingly to the latest third party valuation made on 06 September 2010, the value of above Land, Building and Machinery only was Tk. 28.88 crore.

The Bank has sought permission from the Central Bank for transferring the said asset to the Bank's assets and the issue is under process for the consent of Bangladesh Bank.

5. Operational Risk

Qualitative Disclosure:

5.1 Views of Board of Directors on system to reduce Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal process, people and systems (for example failed IT system, or fraud perpetrated by an OBL employee), or from external causes, whether deliberate, accidental or natural. It is inherent in all of the Bank's activities. Operational risks are monitored and, to the extent possible, controlled and mitigated.

The Bank's approach to operational risk is not designed to eliminate risk altogether but rather, to contain risks within levels deemed acceptable by senior management.

All functions, whether business, control or logistics functions, must manage the operational risks that arise from their activities. Operational risks are pervasive, as a failure in one area may have a potential impact on several other areas. The Bank has therefore established a cross-functional body to actively manage operational risk as part of its governance structure.

The foundation of the operational risk framework is that all functions have adequately defined their roles and responsibilities. The functions can then collectively ensure that there is adequate segregation of duties, complete coverage of risks and clear accountability.
